

HIGHLIGHTER® ELITE

INTRODUCING NEW HIGHLIGHTER ELITE MINI-LIGHT BARS

Federal Signal is pleased to announce the addition of the HighLighter® Elite to our mini-light bar product line. The HighLighter Elite mini-light bar leverages the latest and greatest technological advancements to offer users a mini-light bar that is compact, durable, easy to install, and diverse in its capabilities.

Equipped with Solaris® Reflector Technology, the HighLighter Elite provides brilliant illumination 360 degrees around your vehicle, while standing less than two inches tall. This mini-light bar is both SAE J845 Class 1 and CCR Title 13 compliant, making it an excellent choice for anyone seeking a light bar that improves safety while also adhering to regulatory standards.

The HighLighter Elite can be purchased in a variety of colors, including Amber, Blue, Green, Red, and White. Dual-color models are equipped with SpectraLux® to offer greater customization of your mini LED light bar. Each light bar is capable of (25) different flash patterns, including the unique “edge cruise” lighting (in dual-color models). The wide variety of colors and flash patterns ensure that there is a suitable model for every application including utility, towing, and construction vehicles.

The HighLighter Elite uses FSLink® technology to offer greater synchronization and ease of use amongst Federal Signal products. This shared flash pattern software allows the various products to be wired together, set in a common pattern, and then synchronized together in order to flash simultaneously or alternately. All lighting solutions can be managed quickly and easily when using FSLink Technology.

This LED mini-light bar is available in both permanent and temporary mounting solutions, which include both magnet and suction-cup magnet mounts. They are also IP69K rated against dust and water, and are built utilizing patented ROC (Reliable Onboard Circuitry™) technology, which is built to minimize potential failure points in the light bar and ensures that this mini-light bar can withstand the trials faced on and off the road.
