

Introducing the new Pathfinder® with Handheld Controller

Pathfinder® is a compact, programmable siren and light controller now available with a handheld control head. The new handheld features fourteen dual color backlit push-buttons, and the ergonomic design provides convenient volume control and push to talk button on the sides of the controller. For convenient visual reference, the Pathfinder handheld emulates the selected pattern of the SignalMaster operation at the top of the controller.

The Pathfinder handheld control head has a magnetic mount and includes brackets for fixed or swivel mounting. The microphone is integrated in the control head, eliminating the need to run a mic cable back to the amplifier. For increased versatility the amplifier offers a ¼" jack microphone plug option, (¼" jack microphone and remote extension kit sold separately).

FEATURES

- 100/200 Watt siren/light controller with PA and noise canceling microphone
- (14) dual color (Red/Blue) backlit programmable push buttons
- Built-in dual tone capability
- Built-in Rumbler® Intersection Clearing capability
- Optional FS Vehicle On-Board Diagnostics Intergation (OBDII)
- Programmable timer feature
- Siren tones, PA, Radio Rebroadcast and Air Horn
- Library of selectable siren tones includes Unitrol and Powercall siren tones
- Horn Ring Transfer and Park Kill
- Backlit LEDs on handheld controller emulate SignalMaster™ directional warning operation
- (7) programmable inputs and (12) programmable solid-state relay outputs
- Convergence Network Configuration Software allows for easy customization of siren and light functions
- (2) Convergence Network ports
- Meets or exceeds SAE, California Title 13 and NFPA requirements
- Five-year warranty
