Side Mirror Bracket is Now Available for the 2021 Chevrolet Tahoe

A new side mirror bracket for the 2021 Chevrolet Tahoe is now available to order. The bracket kit includes a pair of brackets to mount (1) MicroPulse® Wide Angle 9 light head to each side mirror.

Each kit includes driver and passenger side brackets as well as mounting hardware. Each bracket features an integrated shroud to reduce back-flash to interior passengers. Installation of this kit does not require the removal of mirror glass or top mirror cap, therefore reducing installation time. This kit is also compatible with the 2021 Chevrolet Suburban.
